

**MONDAY
MAY 7TH**

#SHUTDOWNCHASE

On May 7th, folks across the country are taking action to #ShutDownChase!

JPMorgan Chase (JPMC) was already the biggest financier of extreme fossil fuels on Wall Street, but now the bank has doubled down, increasing its investments in devastating fossil fuels by over \$4 billion last year. Chase is putting bankers' bonuses ahead of supporting communities and the planet.

Last year's action in Seattle

Join us Monday, May 7th at 4pm in front of the Chase Bank branch at 4th and C Streets in San Rafael for a protest action and rally. Help us serve a giant notice of eviction to the JP Morgan Chase corporation that they are mortgaging our future and have fallen hopelessly behind in their payments of honesty, decency, and positive contributions to our world's well-being.
