Who’s Financing the Climate Crisis?

APRIL 10TH

Bring your signs and come join us to stop fossil fuel $$

Chase Bank
Red Hill Shopping Center
894 Sir Francis Drake Blvd, San Anselmo
4:30 PM Protest at the bank
5-6 PM March, Protest at the hub

350Marin
JPMorgan Chase, the world’s #1 banker of climate change

33 of the world’s largest banks poured $1.9 trillion dollars into fossil fuels since the Paris Agreement was signed (2016-2018). $600 billion of this went to 100 top companies aggressively expanding fossil fuels.

The big 6 U.S. banks, including JPMorgan Chase, Wells Fargo, Citi, and Bank of America, account for 37% of global fossil fuel financing.

JPMorgan Chase is the #1 banker of fossil fuels, representing 29% of all global fossil fuel funding.

JPMorgan Chase led all banks with a 68% expansion of its lending to fossil fuel projects in the last 3 years.

JPMorgan Chase is the #1 banker of Arctic oil and gas, #1 banker of ultra-deep water oil and gas, #2 banker of fracking (just behind Wells Fargo), and #1 U.S. banker of tar sands.

JPMorgan Chase is the only bank financing ALL FOUR key tar sands expansion companies.

The science is clear. We need an immediate end to the expansion of fossil fuel extraction and infrastructure in order to limit global warming and avoid planetary catastrophe. And yet, bank funding continues to be aligned with climate disaster.
